

Classic Saligna parasol

Tradewinds parasols have become the world-wide industry standard for high specification hardwood parasols. Refined over a period of 17 years, Tradewinds Classic parasols are made from high specification materials that are suitable for use in extreme climatic conditions. High quality materials and workmanship ensure that Tradewinds parasols are the no 1 choice for corporate, private & promotional buyers.

The Frame of Classic Saligna umbrellas are made from the finest kiln dried Eucalyptus timber and assembled with stainless steel fittings for high durability. Fabric options are naturally resistant to rotting and mildew, acids and alkalis and in addition, all fabrics are Teflon treated to provide water, oil and soil protection.

Key Features:

- Frame produced from Eucalyptus Grandis (saligna)
- All fittings and fasteners produced from marine grade stainless steel 304
- Stainless Steel Pulley system
- U bracket Stainless Steel
- Acorn
- Low maintenance lacquer finish on timber frame

Opening the umbrella and Safety

When opening the umbrella, pull out the ribs to ensure they move freely, and then gently pull on the pulley cord to slowly raise the sliding hub upwards. Continue to raise until the fabric is taut and then insert the pin into the highest possible hole. A tautly erected Umbrella will be stronger and will not allow the canvas to whiplash in the wind which may cause the strut ends to break. The umbrella should be closed prior to the onset of strong gusty wind conditions and covered with heavy duty protective PVC cover only when dry.

Timber Maintenance

The timber components of this umbrella were treated with a durable lacquer finish, which can be maintained with penetrating oil or lacquer such as found in DIY cans. Should the lacquer finish become damaged or need to be replaced, it may be removed by using paint remover and sanding and thereafter replaced with Tradewinds Natural Timber Sealer

Fabric Maintenance

To clean the fabric, open the umbrella and put on its side and remove dirt using a soft brush with water. In order to protect the Teflon properties, use only a mild detergent that does not contain ammonia and never dry-clean the fabric.

Guarantee

Classic Saligna umbrellas are guaranteed, from original date of purchase by the initial buyer, for a period of 2 years against defects in metal fixtures & fittings and against defects resulting from faulty workmanship. Although the manufacturer strives to provide the highest quality, we accept no responsibility for defects in timber, colour variation of processed wood, fading of fabric or fabric print degradation. The manufacturer will not be liable for any extra costs incurred by the buyer as a result of defects found in the product or as a result of faulty product, over and above those covered in the guarantee contained in the paragraph above.

Tradewinds products are covered by a full spares backup from our international dealer network.
